

3 WAYS

To Get the Most Fuel Efficiency
Out of the All-New Volvo VNL

The all-new Volvo VNL is designed with efficiency at its core. Here's how to unlock its fuel-saving potential.

TIP #1 Leverage the Aerodynamic Design

- Keep aerodynamic devices installed and in good condition — like side fairings and roof extenders.
- Minimize exterior add-ons (like light bars, roof racks) that disrupt airflow.

"With the technology available on today's Volvo VNL trucks, we can access and analyze detailed performance data while factoring in each customer's unique spec. The result is a clear, actionable path to maximizing fuel efficiency and getting the most out of every mile."

-Justin Candea, VP Truck Sales

TIP #2 Use the I-Shift Transmission Smartly

- Stay in automated mode for best performance unless you're in very specific driving conditions (like mountain grades).
- Avoid excessive idling or revving. The I-Shift is designed to minimize fuel-wasting behaviors automatically.

TIP #3 Optimize Powertrain Configurations

- Choose the D13TC for long-haul applications to benefit from its best-in-class fuel economy.
- Match axle ratios and engine configurations to your route profile — Volvo offers multiple options for flat, rolling, or mountainous terrains.

Want to get the most miles out of every gallon? We've got more fuel-saving tips coming your way in next month's flyer—don't miss it!

STOCKED WITH THE PARTS YOU NEED

Young Trucks isn't just selling the new Volvo lineup—we're also fully stocked with genuine Volvo parts for these next-gen models. Keep your new trucks running like new with expert parts support and fast availability.

Young Trucks' New State-of-the-Art Truck Wash

Young Trucks continues progress on building a modern, high-performance truck wash at our new dealership campus in Canton, OH. Designed to handle everything from commercial trucks to vans, coaches, and even oil field and mining vehicles, the system will make it easier than ever to keep your fleet clean and looking professional.

At the center of the facility is a hybrid rollover wash that combines the efficiency of a three-brush system with the flexibility of high-pressure, touchless cleaning. The system is built to adapt to vehicles of varying shapes and sizes, utilizing sensors that "feel" the contours of your truck and trailer and safely deliver a thorough clean.

The truck wash is slated to open this year and will include fleet programs to provide added convenience and value for commercial operators.

Stay tuned for more updates as we prepare to open one of the region's most advanced truck wash facilities!

RULES OF THE ROAD

To stay true to our purpose, we follow a set of guiding principles we call the Rules of the Road — a system for how we show up, serve others, and stand out.

#2 FIGHT EVERY OBSTACLE AND CONQUER ALL.

For 70 years, through four generations, we've been here and we'll be here, helping the trucking community get back on the road and back to business.

Visit a **Young Trucks location** for sales, leasing, fleet maintenance, finance, parts, service, body shop, trailer, and more specialized services to keep you moving.

GET TO KNOW OUR TEAM

MEET STEVE MURPHY, THE SERVICE DIRECTOR AT YOUNG TRUCKS

With nearly two decades of experience at Young Trucks, Steve Murphy brings a technician's perspective and a leader's focus to our service operations. From shop floor to strategy, he's played a vital role in raising the standard of service our customers count on. Here's a quick Q&A to help you get to know him.

Q: HOW DID YOUR JOURNEY WITH YOUNG TRUCKS BEGIN?

Steve: I started as a technician in 2006 and worked my way up to foreman. Over the years, I moved into leadership roles, most recently as Service Manager and now Service Director. That time in the shop taught me how important fast, reliable service is to our customers—and that's what I still focus on today.

Q: WHAT ARE YOU MOST EXCITED ABOUT WITH THE NEW YOUNG FREIGHTLINER / ISUZU DEALERSHIP?

Steve: The new facility gives us more tools to serve our customers better—more bays, better parts access, and a more efficient layout. It's designed to improve our turnaround times and the overall service experience.

Q: WHAT DOES ELITE SUPPORT MEAN FOR YOUR TEAM AND YOUR CUSTOMERS?

Steve: It's our promise to deliver consistent, high-quality service with transparency and speed. Our team is trained and certified to meet those expectations every day—it's something we take a lot of pride in.

Q: ARE THERE ANY TRENDS IN COMMERCIAL TRUCK SERVICE CUSTOMERS SHOULD KNOW ABOUT?

Steve: Trucks are more advanced than ever, so diagnostics and technician training are key. We're also seeing more fleets prioritize preventive maintenance, which helps reduce unexpected downtime and repair costs.

NOW OFFERING

\$385.97
INSTALLED

Installation of Muscle Power Tires MP967 is subject to a \$25 disposal fee per tire. Prices, availability, and specifications are subject to change without notice. Additional services or taxes may apply.
